

Why You Should Get a Baseline Test

- To know immune status at exposure
- To know infection status at exposure

Why You Should Get a Follow-up Test

- To know seroconversion status post exposure
- To know infection status after initial incubation period post exposure

Ideal for High-Risk Occupational Settings

Primate research facilities
Laboratory staff handling NHP samples

Testing Recommended Immediately for

Keepers and habitat staff
Hospital and quarantine staff
Primate specialists

Testing Critical for

Post-exposure evaluations &
Fit-for-duty assessments
Incident/accident documentation &
institutional compliance

Herpes B Virus Testing For Humans and Non-Human Primates

Made friendly, fast, and
confidential for safety
without the stress.

What is B-Virus

Herpes B Virus (B-Virus) is a naturally occurring pathogen of macaque monkeys.

B-Virus infection is rare in Humans but working with Non-Human Primates may lead to exposure.

In such cases, rapid and accurate B-virus testing is essential.

Our specialized testing service delivers fast and reliable results to support workplace safety, research compliance, ongoing occupational health programs and post-exposure evaluation.

Get Tested Immediately If:

- > Scratched or bitten by NHP
- > Exposed to NHP saliva/other bodily fluids
- > Contact with contaminated cages, restraints, or bedding
- > Any incident where exposure cannot be ruled out

If Exposure Happens:

- > Stay calm and wash the area with soap and water immediately
- > Notify supervisor or designated safety contact
- > Follow Institutional exposure guidelines
- > Reach out to ZE Labs for testing and next steps

Testing Services for Human and Non-Human Primates

Why Our Testing is the Right Choice:

- > **High-Sensitivity Laboratory Testing**
Provides reliable results when time matters most.
- > **Purpose-Built for Zoological & Animal Care Settings**
Designed for staff who work closely with Non-Human Primates.
- > **Trusted by Occupational Health Professionals**
Supports exposure assessments, return-to-work decisions, and compliance.
- > **Rapid Turnaround Times**
- > **Expert Support & Guidance for Exposure Incidents**
- > **Confidential, Compliant, and Secure**
